TECHNICAL SEMINAR

Saturday, August 9th, 2008

Fireman's Hall & Museum

9:00 AM

The UMR CCCA invites you to a diagnostic technical seminar. It is designed to help you tell your mechanic what might be the problem with *your* car.

Included will be information on subjects such as electrical and mechanical systems, carburetion, vibrations, tires, suspension, etc. It is not a 'how-to' repair seminar, but is designed to help you diagnose problems. That can save you money and time at the garage.

We plan on having guest speakers.

Saturday, August 9th, 9:00 AM

Firefighters Hall and Museum

664 22 Ave NE

Minneapolis
